Gas Laws: $PV=nRT$, Dalton, Graham & Tricks

Printable Flashcards — Pre-Med Chemistry

Ideal gas law ($PV=nRT$), units, R values, STP, Boyle's/Charles'/Gay-Lussac's/Combined/Avogadro's laws, Dalton's law, mole fractions, gas over water, gas density, gas stoichiometry, kinetic theory, Graham's law, and ideal vs real gases.

160 cards — Print double-sided, flip on long edge, then cut along dashed lines.

160 cards — Printable Flashcards

1

Ideal gas law in one line:

2

In $PV=nRT$, what are the units that match $R = 0.0821$?

3

Trap: temperature in $PV=nRT$ can be in $^{\circ}\text{C}$ as long as you're consistent. True or false?

4

Kelvin conversion: $\text{K} = ^{\circ}\text{C} + \underline{\hspace{2cm}}$

5

Quick sanity check: if temperature goes up (P constant), volume should...

6

Quick sanity check: if volume goes down (T constant), pressure should...

7

What does 'ideal gas' secretly assume?

8

When does real gas behavior matter most?

2

P in atm, V in L, n in mol, T in K.

entermedschool.org

1

$PV = nRT.$

entermedschool.org

4

273

entermedschool.org

3

False.

entermedschool.org

6

Go up.

entermedschool.org

5

Go up.

entermedschool.org

8

High pressure and low temperature.

entermedschool.org

7

Gas particles have negligible volume
and no intermolecular forces.

entermedschool.org

9

Trap: gas laws apply only to oxygen and nitrogen. True or false?

10

If a problem gives you grams of a gas, what extra step do you need before $PV=nRT$?

11

Ideal gas law: $\{P\}\{V\}$
 $= \{n\}\{R\}\{T\}$.

12

One atm equals...

13

1 atm = _____ mmHg

14

1 atm _____ kPa

15

R value if you use atm and liters:

16

R value if you use kPa and liters:

10

Convert grams \rightarrow moles ($n = m/M$).

entermedschool.org

9

False.

entermedschool.org

12

760 mmHg (torr) and about 101.3 kPa.

entermedschool.org

11

Ideal gas law: $PV = nRT$.

entermedschool.org

14

101.3

entermedschool.org

13

760

entermedschool.org

16

$R = 8.314 \text{ L} \cdot \text{kPa}/(\text{mol} \cdot \text{K})$.

entermedschool.org

15

$R = 0.0821 \text{ L} \cdot \text{atm}/(\text{mol} \cdot \text{K})$.

entermedschool.org

17

R value in energy units (thermo):

18

Trap: you can use $R=0.0821$ even if pressure is in kPa. True or false?

19

Volume unit trap: $PV=nRT$ expects volume in liters (if $R=0.0821$). So 250 mL =

20

Temperature quick: 25°C in Kelvin is about...

21

Temperature quick: 0°C in Kelvin is...

22

Pressure quick: 1520 mmHg is how many atm?

23

Pressure quick: 380 mmHg is how many atm?

24

Key conversions: $1 \text{ atm} = \{c1::760\}$
 $\text{mmHg} = \{c2::101.3\} \text{ kPa}$.

18

False.

entermedschool.org

17

$R = 8.314 \text{ J}/(\text{mol} \cdot \text{K})$.

entermedschool.org

20

298 K.

entermedschool.org

19

0.250 L.

entermedschool.org

22

2 atm.

entermedschool.org

21

273 K.

entermedschool.org

24

Key conversions: $1 \text{ atm} = 760 \text{ mmHg} = 101.3 \text{ kPa}$.

entermedschool.org

23

0.5 atm.

entermedschool.org

25

At STP (0°C , 1 atm), 1 mol of an ideal gas occupies about...

26

At room temperature ($\sim 25^{\circ}\text{C}$) and 1 atm, 1 mol of gas is closer to...

27

Trap: STP always means 25°C . True or false?

28

Quick STP: 11.2 L of any ideal gas at STP is how many moles?

29

Quick STP: 44.8 L of gas at STP is how many moles?

30

Quick STP: 5.6 L of gas at STP is how many moles?

31

Quick STP: 0.10 mol of any gas at STP occupies...

32

Molar volume at STP (L/mol):

26

24 L (about 24.5 L).

entermedschool.org

25

22.4 L.

entermedschool.org

28

0.50 mol.

entermedschool.org

27

False.

entermedschool.org

30

0.25 mol.

entermedschool.org

29

2.00 mol.

entermedschool.org

32

22.4

entermedschool.org

31

2.24 L.

entermedschool.org

33

Boyle's law is used when _____ is constant.

34

Boyle's law formula:

35

Quick: if you cut the volume in half
(T constant), pressure becomes...

36

Quick: $P_1=1$ atm, $V_1=2.0$ L. If
 $V_2=0.50$ L (T constant), $P_2=$

37

Trap: in Boyle's law, pressure and volume
change in the same direction. True or false?

38

Boyle's law (T constant):
 $\{c1::P_1V_1\} = \{c2::P_2V_2\}$.

39

Charles' law is used when _____ is constant.

40

Charles' law formula:

34

$$P_1V_1 = P_2V_2.$$

entermedschool.org

33

Temperature (and moles).

entermedschool.org

36

4.0 atm.

entermedschool.org

35

Double.

entermedschool.org

38

Boyle's law (T constant): $P_1V_1 = P_2V_2$.

entermedschool.org

37

False.

entermedschool.org

40

$$V_1/T_1 = V_2/T_2 \text{ (T in Kelvin).}$$

entermedschool.org

39

Pressure (and moles).

entermedschool.org

41

Quick: if temperature (K) doubles at constant pressure, volume becomes...

42

Quick: a gas is 3.0 L at 300 K. What volume at 600 K (same pressure)?

43

Trap: Charles' law works with Celsius if you add 273 at the end. True or false?

44

Charles' law (P constant): $\frac{V_1}{T_1} = \frac{V_2}{T_2}$ (T in K).

45

Gay-Lussac's law is used when _____ is constant.

46

Gay-Lussac's law formula:

47

Quick: a gas is 1.0 atm at 300 K in a rigid container. At 600 K, pressure is...

48

Trap: heating a gas in a rigid container lowers pressure because gas expands. True or false?

42

6.0 L.

entermedschool.org

41

Double.

entermedschool.org

44

Charles' law (P constant):
 $V_1/T_1 = V_2/T_2$ (T in K).

entermedschool.org

43

False.

entermedschool.org

46

$P_1/T_1 = P_2/T_2$ (T in Kelvin).

entermedschool.org

45

Volume (and moles).

entermedschool.org

48

False.

entermedschool.org

47

2.0 atm.

entermedschool.org

49

Gay-Lussac (V constant):
 $\left\{ \left\{ c1::P1/T1 \right\} \right\} = \left\{ \left\{ c2::P2/T2 \right\} \right\}$.

50

Combined gas law is basically Boyle + Charles + Gay-Lussac together, when _____ is constant.

51

Combined gas law formula:

52

Quick: a gas at 1 atm, 2.0 L, 300 K. If it goes to 2 atm and 600 K, new volume is...

53

Trap: in combined gas law, you can keep temperature in Celsius because it cancels. True or false?

54

Combined gas law: $\left\{ \left\{ c1::P1V1/T1 \right\} \right\} = \left\{ \left\{ c2::P2V2/T2 \right\} \right\}$ (n constant).

55

Avogadro's law applies when P and T are constant. It says...

56

Quick: at constant P and T, if moles triple, volume becomes...

50

Number of moles (n).

entermedschool.org

49

Gay-Lussac (V constant): $P_1/T_1 = P_2/T_2$.

entermedschool.org

52

2.0 L.

entermedschool.org

51

$P_1V_1/T_1 = P_2V_2/T_2$.

entermedschool.org

54

Combined gas law: $P_1V_1/T_1 = P_2V_2/T_2$ (n constant).

entermedschool.org

53

False.

entermedschool.org

56

Triple.

entermedschool.org

55

Volume is proportional to moles: $V_1/n_1 = V_2/n_2$.

entermedschool.org

57

Trap: if two gases have the same volume at the same T and P, they must have the same mass. True or false?

58

Avogadro's law (P,T constant):
 $\{c1::V1/n1\} = \{c2::V2/n2\}$.

59

Dalton's law in one line:

60

Partial pressure formula using mole fraction:

61

Trap: in a gas mixture, heavier gases have higher partial pressure. True or false?

62

If a container has 2 mol N_2 and 1 mol O_2 , mole fraction of O_2 is...

63

Same mixture: if $P_{total} = 0.90$ atm, partial pressure of O_2 is...

64

Trap: partial pressures depend on volume each gas 'takes'. True or false?

58

Avogadro's law (P, T constant): $V_1/n_1 = V_2/n_2$.

entermedschool.org

57

False.

entermedschool.org

60

$P_i = x_i * P_{\text{total}}$, where $x_i = n_i / n_{\text{total}}$.

entermedschool.org

59

$P_{\text{total}} = P_1 + P_2 + P_3 + \dots$

entermedschool.org

62

1/3.

entermedschool.org

61

False.

entermedschool.org

64

False (for ideal gases).

entermedschool.org

63

0.30 atm.

entermedschool.org

65

Dalton's law: $P_{\text{total}} =$
 $\{\{c1::\text{sum of partial pressures}\}\}$.

66

If $x_{\text{CO}_2} = 0.20$ and total
pressure is 2.0 atm, $P_{\text{CO}_2} =$

67

Gas collected over water:
what pressure is measured?

68

So the correction is:

69

Trap: when collecting gas over
water, you add water vapor pressure
to get gas pressure. True or false?

70

If $P_{\text{total}} = 760$ mmHg and $P_{\text{H}_2\text{O}}$
 $= 20$ mmHg, dry gas pressure is...

71

Why does warmer water
make this correction bigger?

72

Collected over water: $P_{\text{gas}} =$
 $P_{\text{total}} - \{\{c1::P_{\text{water vapor}}\}\}$.

66

0.40 atm

entermedschool.org

65

Dalton's law: $P_{\text{total}} = \text{sum of partial pressures.}$

entermedschool.org

68

$P_{\text{gas}} = P_{\text{total}} - P_{\text{water vapor.}}$

entermedschool.org

67

Total pressure = $P_{\text{gas}} + P_{\text{water vapor.}}$

entermedschool.org

70

740 mmHg.

entermedschool.org

69

False.

entermedschool.org

72

Collected over water: $P_{\text{gas}} = P_{\text{total}} - P_{\text{water vapor.}}$

entermedschool.org

71

Water vapor pressure increases with temperature.

entermedschool.org

73

If you know P, V, and T, the fastest way to get moles is:

74

If you know moles and want volume:

75

Example: 1.0 mol gas at 1.0 atm and 273 K. Volume is about...

76

Example: 0.50 mol gas at 2.0 atm and 273 K. Volume is about...

77

Example: 1.0 mol at 0.50 atm and 273 K. Volume is about...

78

Example: 1.0 mol at 1 atm and 546 K. Volume is about...

79

Trap: if T increases, P must increase. True or false?

80

Exam habit: before doing any gas calculation, always check these 3 things:

74

$$V = nRT / P.$$

entermedschool.org

73

$$n = PV / (RT).$$

entermedschool.org

76

5.6 L.

entermedschool.org

75

22.4 L.

entermedschool.org

78

44.8 L.

entermedschool.org

77

44.8 L.

entermedschool.org

80

Kelvin? Pressure units? Volume units?

entermedschool.org

79

Depends.

entermedschool.org

81

Gas density trick: from $PV=nRT$ you can get...

82

So if they give gas density and conditions, molar mass is:

83

Trap: gas density is usually given in g/mL. True or false?

84

Concept: at the same T and P, which gas is denser?

85

Quick: at the same T and P, CO_2 vs O_2 : which is denser?

86

Quick: at the same T and P, He vs Ar: which is denser?

87

Quick numeric: A gas has density 1.25 g/L at 1 atm and 273 K. What's molar mass (approx)?

88

Gas density formula: $d = \frac{PM}{RT}$.

82

$$M = dRT / P.$$

entermedschool.org

81

$$d = PM / (RT).$$

entermedschool.org

84

The one with bigger molar mass (M).

entermedschool.org

83

False (usually).

entermedschool.org

86

Ar is much denser.

entermedschool.org

85

CO₂ (44 g/mol) is denser than O₂ (32 g/mol).

entermedschool.org

88

Gas density formula: $d = PM/RT$.

entermedschool.org

87

About 28 g/mol.

entermedschool.org

89

At same T and P, the denser gas has the _____ molar mass.

90

Gas stoichiometry shortcut: at the same T and P, gas volumes are proportional to...

91

Example: $2\text{H}_2(\text{g}) + \text{O}_2(\text{g}) \rightarrow 2\text{H}_2\text{O}(\text{g})$. At same T,P, the volume ratio $\text{H}_2:\text{O}_2$ needed is...

92

Example: $\text{N}_2(\text{g}) + 3\text{H}_2(\text{g}) \rightarrow 2\text{NH}_3(\text{g})$.
If you have 30 L of H_2 (same T,P),
max NH_3 volume you can make is...

93

Trap: volume ratios only work if gases are at the same temperature and pressure. True or false?

94

If a stoichiometry question gives volumes of gases at STP, you can convert volume to moles using...

95

Trap: in gas stoichiometry, coefficients compare liters directly even if it's not STP. True or false?

96

At constant T and P: volume ratio = $\{\{c_1::\text{mole ratio}\}\}$ (use coefficients).

90

Moles (and the coefficients in the balanced equation).

entermedschool.org

89

larger

entermedschool.org

92

20 L (if N₂ is excess).

entermedschool.org

91

2:1.

entermedschool.org

94

$n = V/22.4.$

entermedschool.org

93

True.

entermedschool.org

96

At constant T and P: volume ratio = mole ratio (use coefficients).

entermedschool.org

95

False.

entermedschool.org

97

Average kinetic energy of a gas depends on...

98

Trap: at the same temperature, heavier gas molecules move faster. True or false?

99

At the same temperature, which moves faster on average: He or O₂?

100

Root-mean-square speed relationship (you don't need to memorize the full formula):

101

Gas pressure comes from...

102

If you increase temperature, pressure increases (at fixed volume) because...

103

At the same temperature, all gases have the same average $\{c_1::kinetic\ energy\}$.

104

Graham's law compares effusion/diffusion rates:

98

False.

entermedschool.org

97

Temperature only (in Kelvin).

entermedschool.org

100

 $u_{rms} = \sqrt{T/M}$.entermedschool.org

99

He.

entermedschool.org

102

Molecules hit the walls more often and with more energy.

entermedschool.org

101

Collisions of gas particles with the container walls.

entermedschool.org

104

 $rate1/rate2 = \sqrt{M2/M1}$.entermedschool.org

103

At the same temperature, all gases have the same average kinetic energy.

entermedschool.org

105

Trap: if molar mass doubles,
diffusion rate halves. True or false?

106

Quick: Compare rates of H_2 (2 g/mol) and
 O_2 (32 g/mol): H_2 is faster by factor...

107

Quick: Which diffuses faster:
 NH_3 (17) or HCl (36.5)?

108

Classic demo logic: why does the
 NH_3/HCl ring form closer to the HCl side?

109

Graham's law: $rate_1/rate_2$
 $= \sqrt{M_2/M_1}$.

110

Which diffuses faster (same T): He or CO_2 ?

111

Question gives P_1, V_1 and P_2, V_2
only, and says T constant. Use:

112

Question gives V_1, T_1 and V_2, T_2
only, pressure constant. Use:

106

4 times.

entermedschool.org

105

False.

entermedschool.org

108

NH₃ diffuses faster, so it travels farther in the same time.

entermedschool.org

107

NH₃ diffuses faster.

entermedschool.org

110

He

entermedschool.org

109

Graham's law: $\text{rate}_1/\text{rate}_2 = \sqrt{M_2/M_1}$.

entermedschool.org

112

Charles' law ($V_1/T_1=V_2/T_2$).

entermedschool.org

111

Boyle's law ($P_1V_1=P_2V_2$).

entermedschool.org

113

Question gives P_1, T_1 and P_2, T_2 only, volume constant. Use:

114

Question changes P, V, T but same amount of gas. Use:

115

Question asks about mixtures and 'partial pressure'. Use:

116

Question gives density of a gas and asks molar mass. Use:

117

Question asks how diffusion/effusion speed changes with molar mass. Use:

118

Trap: $PV=nRT$ only works at STP. True or false?

119

Trap: 'n' in $PV=nRT$ is number of molecules. True or false?

120

If the number of moles doubles at constant T and V , pressure becomes...

114

Combined gas law ($P_1V_1/T_1 = P_2V_2/T_2$).

entermedschool.org

113

Gay-Lussac's law ($P_1/T_1 = P_2/T_2$).

entermedschool.org

116

$M = dRT/P$.

entermedschool.org

115

Dalton's law.

entermedschool.org

118

False.

entermedschool.org

117

Graham's law (rate $1/\sqrt{M}$).

entermedschool.org

120

Double.

entermedschool.org

119

False.

entermedschool.org

121

If the number of moles doubles at constant T and P, volume becomes...

122

At constant P and T, equal volumes of different gases contain equal...

123

Trap: if two gases have the same pressure in the same container, they must have the same number of moles. True or false?

124

If you are solving for n using $PV=nRT$, the 'V' is the volume of...

125

If a problem says 'at constant pressure', your brain should immediately think:

126

If a problem says 'rigid container', your brain should immediately think:

127

Unit check trick: if you used $PV=nRT$ and got moles in 'atm', what does that tell you?

128

A gas has $P=1.0$ atm, $V=24.6$ L, $T=300$ K. n is about...

122

Moles (same number of molecules).

entermedschool.org

121

Double.

entermedschool.org

124

The gas sample (or container) at those conditions.

entermedschool.org

123

False.

entermedschool.org

126

Volume constant \rightarrow Gay-Lussac
(P/T) or $PV=nRT$ with V fixed.

entermedschool.org

125

Charles' law or $PV=nRT$ with P fixed.

entermedschool.org

128

1.0 mol.

entermedschool.org

127

Your units didn't match or you rearranged wrong.

entermedschool.org

129

A gas has $P=2.0$ atm, $V=12.3$ L, $T=300$ K. n is about...

130

At 1 atm and 273 K, what volume does 0.25 mol occupy?

131

At 1 atm, 273 K, 11.2 L of gas contains how many molecules?

132

How many moles of gas are in 2.24 L at STP?

133

A sample is 1.0 L at 1.0 atm. If pressure increases to 4.0 atm (T constant), V becomes...

134

A sample is 2.0 L at 300 K. If cooled to 150 K (P constant), V becomes...

135

A sample is 1.0 atm at 300 K in a rigid container. If cooled to 150 K, P becomes...

136

Combined gas law drill: $P_1=1$ atm, $V_1=2$ L, $T_1=300$ K \rightarrow $P_2=2$ atm, $T_2=600$ K. $V_2 =$

130

5.6 L.

entermedschool.org

129

1.0 mol.

entermedschool.org

132

0.10 mol.

entermedschool.org

131

About 3.01×10^{23} molecules.

entermedschool.org

134

1.0 L.

entermedschool.org

133

0.25 L.

entermedschool.org

136

2 L.

entermedschool.org

135

0.50 atm.

entermedschool.org

137

If a real gas shows LOWER pressure than ideal prediction at moderate pressure, that's usually because...

138

If a real gas shows HIGHER pressure than ideal prediction at very high pressure, that's usually because...

139

Trap: real gases behave most ideally at high pressure. True or false?

140

Best conditions for ideal-gas behavior:

141

You heat a sealed RIGID container. What changes for the gas?

142

You heat a gas in a cylinder with a moveable piston (pressure constant). What changes?

143

You add more gas (more moles) to a rigid container at constant temperature. What changes?

144

You add more gas to a piston-cylinder at constant T and constant external pressure. What happens?

138

Molecules take up real volume (crowding), so collisions are more intense.

entermedschool.org

137

Attractive forces pull molecules together, reducing wall collisions.

entermedschool.org

140

Low pressure and high temperature.

entermedschool.org

139

False.

entermedschool.org

142

Volume increases (pressure stays the same).

entermedschool.org

141

Pressure increases (volume stays the same).

entermedschool.org

144

Volume increases.

entermedschool.org

143

Pressure increases.

entermedschool.org

145

Trap: partial pressure depends on temperature but not volume. True or false?

146

If you double the volume of a gas mixture at constant T, each partial pressure...

147

If you keep the same container and temperature, doubling the moles of ONE gas in a mixture makes its partial pressure...

148

Ideal gas law:

149

Boyle's law:

150

Charles' law:

151

Gay-Lussac's law:

152

Combined gas law:

146

Halves.

entermedschool.org

145

False.

entermedschool.org

148

$PV = nRT$

entermedschool.org

147

Double.

entermedschool.org

150

$V_1/T_1 = V_2/T_2$

entermedschool.org

149

$P_1V_1 = P_2V_2$

entermedschool.org

152

$P_1V_1/T_1 = P_2V_2/T_2$

entermedschool.org

151

$P_1/T_1 = P_2/T_2$

entermedschool.org

Avogadro's law:

154

Dalton's law:

155

Mole fraction definition:

156

Partial pressure formula:

157

Gas collected over water:

158

Gas density formula:

159

Molar mass from density:

160

Graham's law:

154

$$P_{\text{total}} = \sum P_i$$

entermedschool.org

153

$$V_1/n_1 = V_2/n_2$$

entermedschool.org

156

$$P_i = x_i P_{\text{total}}$$

entermedschool.org

155

$$x_i = n_i/n_{\text{total}}$$

entermedschool.org

158

$$d = PM/RT$$

entermedschool.org

157

$$P_{\text{gas}} = P_{\text{total}} - P_{\text{H}_2\text{O}}$$

entermedschool.org

160

$$\text{rate}_1/\text{rate}_2 = \sqrt{(M_2/M_1)}$$

entermedschool.org

159

$$M = dRT/P$$
